About me

I am an experienced developer with a strong focus on native mobile applications and a solid background in JavaScript. With over 10 years in commercial development, including 7+ years dedicated to mobile, I bring extensive knowledge in creating reliable, high-quality products.

My technical expertise spans multiple languages, including Swift, Java, Kotlin, and JavaScript. I utilize JavaScript for building backend services and helpful tools to streamline development. I'm well-versed in the entire app lifecycle—from initial concept through to successful App Store release.

Driven by a passion for impactful technology, I aim to contribute to products that enhance everyday life for users.

Main skills

- **Mobile Development:** iOS (Swift, SwiftUI, CocoaPods, SPM), Android (Kotlin, Java, Android Jetpack)
- **Backend/Frontend:** JavaScript, CoffeeScript, Type Script
- **Databases:** SQLite, PostgreSQL
- **App Marketplaces:** Google Play, Apple App Store
- **Mobile Tools/Platforms:** Firebase, Heap

iOS:

- Language: Swift
- Architecture: MVVM + RxSwift
- Database: SQLite, GRDB, SwiftData
- Network: Alamofire, Starscream

- UI: AutoLayout, SwiftUI (no storyboards)
- Dependency Injection: Factory + DI container
- Package Managers: CocoaPods, SPM
- Firebase: Messaging, Analytics, Crashlytics
- Deployment: Manual (focus on critical unit tests)

Android:

- Language: Java, Kotlin
- Architecture: MVVM + RxJava (Google App Architecture Guides)
- Database: SQLite + Room
- Network: retrofit2 + okhttp3, Socket connections
- UI: View Binding + XML (feature modules in some apps)
- Firebase: Messaging, Analytics, Crashlytics
- Dependency Injection: Dagger2

Server Communications: RESTful HTTP, WebSocket

Languages:

- Ukrainian: Native
- Russian: Native
- English: A2-B1 (Pre-Intermediate to Intermediate)

Experience

2023 - Present

Freelance iOS Developer & Solo Entrepreneur

Creating high-quality, user-friendly iOS solutions for clients, with a focus on Swift and SwiftUI.

2022 - 2023

iOS Mobile Developer | Avirise

Supported and developed mobile applications.

2015 - 2022

Senior Mobile Developer | Global Fleet Management Inc.

Developed GPS tracking and driver tools in native (Kotlin, Swift) and hybrid (Cordova) apps, including Maps, Bluetooth, and Video Streaming.

2014 - 2015

PHP Software Developer | Made It

Built solutions for a hosting provider platform.

2010 - 2014

Senior Software Developer | Government Company

Developed tools for regional government using PHP and JavaScript.

2008 - 2009

Database Developer | Bank "Family"

Enhanced banking tools with database extensions and SQL scripts.

Education

Donetsk State Institute of Artificial Intelligence

Software Engineering
